

Learning Management System

A complete online academy — courses, live classes, exams, materials and online payments — with a clear, itemized cost for running it.

PREPARED FOR

Academy Owner

CAPACITY

~50 users

CURRENCY

Egyptian Pound

DATE

June 2026

1. What the system does

One platform that runs your whole academy online — students register, browse courses, watch lessons, attend live classes, take exams, and pay online.

Register & Login

Secure sign-up and sign-in for admins, instructors and students.

Lecturers

Add lecturers and assign them to courses and groups.

Courses, Lectures & Sessions

Organize content into courses, units and lessons.

Students

Enroll students, group them, and follow their progress.

Materials with access control

Videos, PDFs and audio that only allowed users can open.

Tasks & Assignments

Give homework, collect answers, and grade students.

Exams & Quizzes

Timed online exams with automatic grading.

Online Payments

Collect course fees by card or wallet (Paymob / Fawry).

Online Course Booking

Students browse the catalog and book courses online.

Live Online Sessions

Run live classes and stream them to enrolled students.

2. Two ways to run it

You can rent ready-made services online (Cloud), or buy your own server and keep it at your place (On-site). Here is the simple difference for ~50 users.

EASIER & CHEAPER TO START

Cloud (online)

~750–2,650 EGP / month

- Almost nothing to pay upfront
- No server to buy or fix
- Live classes work smoothly
- Automatic backups
- Grow with one click

On-site (your own server)

~107,000 EGP once

- + ~3,050–6,500 EGP / month to run
- You own the hardware
- You handle fixing & backups
- Live streaming is harder (upload speed)
- Best only for large numbers or special rules

Important about live classes

Sending live video to ~50 people at once needs a very fast and stable internet upload. In Egypt this is the hardest part for an on-site server, so in both options we use a ready live service (Zoom or Google Meet).

3. Cloud option — real prices

These are the actual services and their live prices. Click any card to open the official price page.

Supabase — Database, Login & Storage

The system's backend (data, accounts, files)

0 EGP (Free plan)

supabase.com/pricing — Free, then Pro \$25/mo (~1,250 EGP)

Zoom Pro — Live classes

Up to 100 attendees, long meetings, recording

~750 EGP / month

zoom.com — \$13.33–16.99 / month

Bunny.net Stream — Video hosting

Store & play recorded lessons (pay as you use)

~250–500 EGP / month

bunny.net/pricing/stream — \$0.005/GB store + \$0.01/GB play

Paymob — Online payments

Collect fees by card / wallet. No monthly fee.

2.75% + 3 EGP / payment

paymob.com/en/pricing — charged only per payment

Web hosting — Cloudflare Pages

Hosts the website / web app

0 EGP (Free)

pages.cloudflare.com — free tier is enough

Domain name (yoursite.com)

Your website address, paid once a year

~600 EGP / year (~50/mo)

cloudflare.com/registrar — ~\$10–12 / year

Monthly total — Cloud

MINIMUM (LEAN)

~750 – 1,300 EGP / month

Free database + live service + video. ~9,000–16,000 EGP / year.

COMFORTABLE

~2,650 EGP / month

Supabase Pro + Zoom + video. ~32,000 EGP / year.

One-time only if you publish a mobile app: Google Play ~1,250 EGP (once), Apple ~5,000 EGP / year. A web app needs none of these.

4. On-site option — real prices

If you prefer your own server. These are real products on sale in Egypt with photos and links. Prices change with the dollar, so confirm before buying.

Dell PowerEdge T150 — Server

Xeon E-2314 · 16 GB RAM · tower · the main machine

~66,000 EGP

pcs-souq.com (also 72,000–95,000 elsewhere)

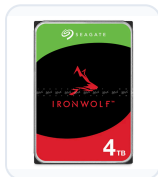

Samsung 980 1TB NVMe — SSD

Fast disk for the system & database

~4,250 EGP

amazon.eg — Samsung 980 1TB

Seagate IronWolf 4TB × 2 — Hard disks

Big storage for videos, mirrored (RAID 1) for safety

~18,800 EGP (2 × 9,400)

contratechnology.com — 9,400 EGP each

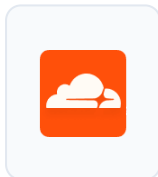

APC Easy UPS 1500VA — Power backup

Keeps the server on during power cuts

~13,000 EGP (7,500–17,000)

compuscience.com.eg — SMV1500AI-GR

Router + network switch

Connects the server to the internet & local network

~5,000 EGP (3,000–8,000)

amazon.eg — search “gigabit switch”

Total hardware (one-time)

~107,000 EGP

Budget build with a mini-PC instead of a server: ~60,000 EGP

Monthly running cost — On-site

Item	Detail	EGP / month
Business internet	Fixed IP + fast upload (needed for live & video)	1,500 – 4,000
Electricity	Server running 24 hours	500 – 1,200
Backup (online copy)	Safety copy of data & files	250 – 500
Live classes service	Zoom / Google Meet	~750
Domain	Website address	~50
Total per month		~3,050 – 6,500

5. Quick comparison

Question	Cloud (online)	On-site (own server)
Money to start	Almost 0	~107,000 EGP
Monthly cost (50 users)	750 – 2,650 EGP	3,050 – 6,500 EGP
Time to launch	A few hours	Days to weeks
Who fixes problems	The service provider	You
Live classes	Easy	Harder (upload speed)
Growing later	One click	Buy more hardware
Backups	Automatic	You set them up

6. Our recommendation

Best choice for a 50-student academy: Cloud

Start on the cloud — it costs almost nothing upfront, runs reliably, and live classes work well.

Minimum running cost: ~750–1,300 EGP / month (about 9,000–16,000 EGP for the first year).

Comfortable setup: ~2,650 EGP / month (about 32,000 EGP / year).

You can move to your own server later if the academy grows a lot.

CLOUD — YEAR 1 TOTAL

~9,000 – 32,000 EGP

No big upfront payment.

ON-SITE — YEAR 1 TOTAL

~143,000 – 185,000 EGP

~107,000 hardware + ~36,000–78,000 running.

Prices are real market values in Egypt as of June 2026 (1 USD ≈ 50 EGP). Cloud prices are set in US dollars and may change with the exchange rate. Hardware prices change with stock; please confirm with the seller before buying. Payment fees are charged per payment, not monthly.
