

DEVELOPMENT COST — INTERNAL

LMS Development Cost Estimate

Detailed, feature-by-feature estimate of the developer effort to build the full Learning Management System — at minimum Egyptian-market rates.

SCOPE

Full system build

PRICING

Minimum (Egypt)

CURRENCY

Egyptian Pound

DATE

June 2026

1. How this estimate is built

Each feature is broken into work and a number of working days. The cost is the days multiplied by a daily rate. Below are the daily rates used for a freelance Flutter + Supabase developer in Egypt (2026).

MINIMUM RATE (USED HERE)
1,200 EGP / day
~150 EGP/hour · entry freelance

FAIR (MID-LEVEL)
2,000 EGP / day
~250 EGP/hour · recommended

SENIOR
3,500+ EGP / day
~440 EGP/hour

What "minimum" means

The numbers in this document use the lowest professional rate (1,200 EGP/day). It is the floor for solid, working code — not a hobby price. A fair mid-level price would be roughly **1.7x** these totals (shown at the end).

2. Detailed cost per feature

#	Module / feature	Main work	Days	Min cost (EGP)
1	Setup & foundation	Project structure, navigation, light/dark theme, Arabic/English, responsive base	4	4,800
2	Authentication & roles	Register, login, password reset, email verify, role-based access (admin/instructor/student)	3	3,600
3	Admin dashboard	Users & role management, statistics, centers CRUD	3	3,600
4	Lecturer management	Add lecturers, profiles, assign to courses/groups	1.5	1,800
5	Courses, units & lessons	Full course editor: create/edit courses, modules, lessons, ordering	4	4,800
6	Materials + access control	Upload video/PDF/audio, secure storage, row-level access, file-name handling	2.5	3,000
7	Students & enrollment	Student records, groups/batches, roster, enroll/un-enroll	3	3,600
8	Catalog & booking	Browse, search, filter, course detail, book/enroll flow	2.5	3,000
9	Online payments	Paymob/Fawry integration, callbacks/webhooks, receipts, paid access unlock	4	4,800
10	Tasks & assignments	Create tasks, student submissions, grading & feedback	3	3,600
11	Exams & quizzes	Question builder, timer, auto-grading, results & review	4	4,800
12	Live sessions	Schedule & join live classes, integrate Zoom/Agora/100ms	3	3,600
13	Notifications	In-app notifications, enrollment & activity alerts	1.5	1,800
14	Progress tracking	Video resume, auto-complete, course progress bars	1.5	1,800

15	Profile & avatar	Edit profile, upload avatar	1	1,200
16	Testing & polish	Unit/widget tests, bug fixing, UI polish, error handling	3	3,600
17	Deployment & docs	Web build, Android build, store setup, setup documentation	2	2,400
Total (minimum)			46.5 days	55,800 EGP

3. Totals & timeline

MINIMUM TOTAL (1,200 EGP/DAY)

~55,800 EGP

Floor price for the full system.

FAIR TOTAL (2,000 EGP/DAY)

~93,000 EGP

Recommended mid-level price.

EFFORT

~46–47 working days

Solo, full-time.

CALENDAR TIME

~9–10 weeks

≈ 2 to 2.5 months solo.

4. Suggested payment milestones

Milestone	What's delivered	%	Min EGP
1 — Start	Kickoff, setup, auth & roles working	30%	16,740
2 — Core	Courses, materials, students, catalog, payments	40%	22,320
3 — Delivery	Tasks, exams, live, tests, deploy & handover	30%	16,740
Total		100%	55,800

5. Ongoing maintenance (optional)

After delivery

Monthly support, small changes and bug fixes: **5,000 – 10,000 EGP / month**. New large features are quoted separately using the same day-rate method above.

Estimate based on minimum freelance Flutter + Supabase rates in Egypt (June 2026). Effort in days is an estimate; actual time varies with final requirements and revisions. Infrastructure/server/service costs are NOT included here — they are covered in the separate cost proposal.
